EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to amendment filed on September 07, 2004.

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the prior art of record, the amended claims and additional search of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches an apparatus and method for diagnostic or prognostic analysis on operating parameters of a vehicle which includes at least the capturing a plurality of data points that characterize two or more operating parameters of the vehicle, producing an interrogation signal that includes a selection from among the plurality of data points using a number of semi-passive RF tags, responding to the interrogation signal with the selected data points, and performing the diagnostic or prognostic analysis on the data (claims 10 and 34). Also, neither references teaches a method for monitoring vehicles which includes at least the steps of acquiring at least two operating parameters of a vehicle using two sensor, wirelessly transmitting a first signal representative of the two operating parameters to a first receiver on the vehicle, wirelessly transmitting a second signal representative at least one operating parameters via cellular telephone connected to a remote receiver, processing the operating parameters with a remote receiver, selecting with an on-board processor on the vehicle

Art Unit: 3661

which of the at least two operating parameters are retransmitted based on the value of one or more of the at least two operating parameters, and transmitting a third signal from the remote processor to the on-board processor (claims 18-21).

c. Claims 2-15 and 18-26 and 34 are allowable over the prior art of record (now renumbered as 1-25).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (571) 272-6956.
